Ganesh Gone

Full Stack Developer

Kalyan, Maharashtra, India | ganeshgone200807@gmail.com | github.com/ganeshgone197784-sys | linkedin.com/in/ganeshgone197784-sys

Summary

Full stack developer who enjoys the entire arc of building software — sketching the data model, wiring up the API, and polishing the interface until it feels inevitable. Focused on performance, clean engineering, and shipping complete, production-ready products end-to-end.

Technical Skills

- Languages: JavaScript, TypeScript, HTML5, CSS3
- Frontend: React, Next.js, Tailwind CSS, vanilla JS
- Backend: Node.js, Express, GraphQL, REST APIs
- Data: PostgreSQL, MongoDB, Redis, Firebase
- Tools: Git, Docker, Socket.io, Mapbox, Chart.js

Selected Projects

ROLEX — Headless e-commerce storefront with real-time inventory, Stripe checkout, and a custom admin dashboard.

ZENO HEALTH — Self-serve product analytics dashboard with live event streaming and custom SQL-backed reports.

VELOURA — Luxury perfume e-commerce site with cinematic animations and a custom checkout flow.

BREWED HAVEN — Lightweight headless CMS with a plugin system, built for teams who outgrew static site generators.

ROYAL SPICE — Full-stack restaurant site with online ordering and a real-time kitchen dashboard.

Open Source & Writing

Contributes to open-source developer tooling and writes occasionally about performance and developer experience.

Availability

Open to full-time roles, freelance projects, and interesting collaborations.
